LinkedIn: [Bernard Major](#) || GitHub: [KingdomB](#) || Portfolio: [Live-Portfolio](#)

As a web developer, I enjoy the successful completion of a project where my knowledge is sufficient. But what I appreciate and enjoy more, are the tasks that I do not have any experience with.

I am seeking an entry level web developer position with exposure to DevOps technologies, with a dynamic company that both challenges my abilities and provides scope for advancement opportunities.

Full Stack Web Development Primary Experience

HTML || CSS3 || Bootstrap || jQuery || JSON || MERN Stack || Bash || Git Bash || Git || GitHub || GitLab || REST APIs || Node.js || Express || MongoDB || MySQL || npm || Chrome Developer Tools || Visual Studio Code || Sequelize || Debian/CentOS Linux || Agile (SCRUM) SDLC

Minor Experience

React || Docker || Firebase || Handlebars || Jenkins || JDK || Virtual Machines(Digital Ocean) || Selenium || Maven || Google Cloud Virtual Machines

Coding Interests

Typescript || WebAssembly || DevOps || Python || GSAP || Progressive Web Applications || MEAN || Code Optimization || Kubernetes || Ruby

Strengths

Team player, positive, detail oriented, diligent, conscientious enthusiastic, clear communicator, and a quick learner

Projects:

Google-Promo || [GitHub Repository](#) || [Deployed Here](#)

- Role: Full client side application developer
- Application Functionality: This application uses UI design best practices
- Tech.: JavaScript (Animation), HTML, CSS, Bootstrap3

liri-node-app || [GitHub Repository](#)

- Role: Full server side functionality developer
- Application Functionality: Command line user interface that receives search query inputs, and GET requests to return results from music, movie, and concert APIs
- Tech.: JavaScript, Node.js, Axios, RESTful APIs, Inquirer

Food Searcher || [GitHub Repository](#) || [Deployed Here](#)

- Role: client side JavaScript coding; HTML structure, AJAX calls, regex for field entry validation
- Application Functionality: This app returns nutritional value of foods, and calculates the length of time it takes to burn those calories
- Tech.: jQuery, JavaScript, HTML, CSS, REST APIs, Regex, Materialize

Work Experience

Freelance Web Development | 2020
